

The Daniel Chapter 12 Formula - Final Seven Years!

This chart examines future dates from the years 2014 to 2064 to help identify the most realistic future dates of the Messiah's return to earth to satisfy bible prophecy. In doing so, we can locate Daniel's Final Week or final 7 years. The dates presented are as a result of the Daniel Chapter 12 Formula. This chart/formula may be viewed below. One thousand two hundred sixty days plus 1290 days = 2550 days, and these are the precise days from Yom Teruah to Yom Kippur over seven years. Because of the lunar moon cycles, rarely, the seven years of 2,550 days that begin on Yom Teruah will fall on Yom Kippur. This chart helps identify key dates through symmetry between Torah Calendar and the Jewish Calendar. We believe the Lord's fall feast days are highly significant about the Marriage Supper of the Lamb (Rapture, Yom Teruah, Feast of Trumpets), and the 2nd coming of the Messiah (Yom Kippur).

All Yom Teruah (YT) & Yom Kippur (YK) Dates are based on TorahCalendar.com (TC). Yom Kippur dates from hebcal.com or the Jewish calendar were also used to determine symmetry with TC. All YT dates are from TC to identify the correct Tishri 1 dates based upon exact future algorithmic calculations of the crescent moon that establishes Tishri 1 per scripture. These calendar systems do not abide by the barley or wheat harvests to identify Nissan 1. I do not incorporate other calendar systems either.

Certain assumptions are being made: I am relying on the accuracy and precision of TC about Nissan 1 and Tishri 1. I am relying on timeanddate.com for their accuracy as well.

In conclusion, there are only two future Yom Kippur dates that stand out as being highly probable for the Messiah's return... Those being YK 2029 and YK 2032, with the most realistic being the latter. Beyond 2032, there are simply no future dates that satisfy the Daniel Chapter twelve 2,550 day formula at least up to the year 2051. There is no symmetry between the two calendar systems up to that point in time.

Within the timeanddate.com, there is an option to include the end date in the calculation. The * next to the days indicates that this option was chosen in the calculation. The criteria for choosing this option were if there were 2549 days from YT to YK. Plus or minus one day is still valid for these calculations. Two or more days is not. In addition, symmetry should be within one to three days.

Continuing with the formula, adding 1335 days from Yom Teruah (YT) results in two key future Shavuot dates... May 24, 2026 & May 20, 2029.

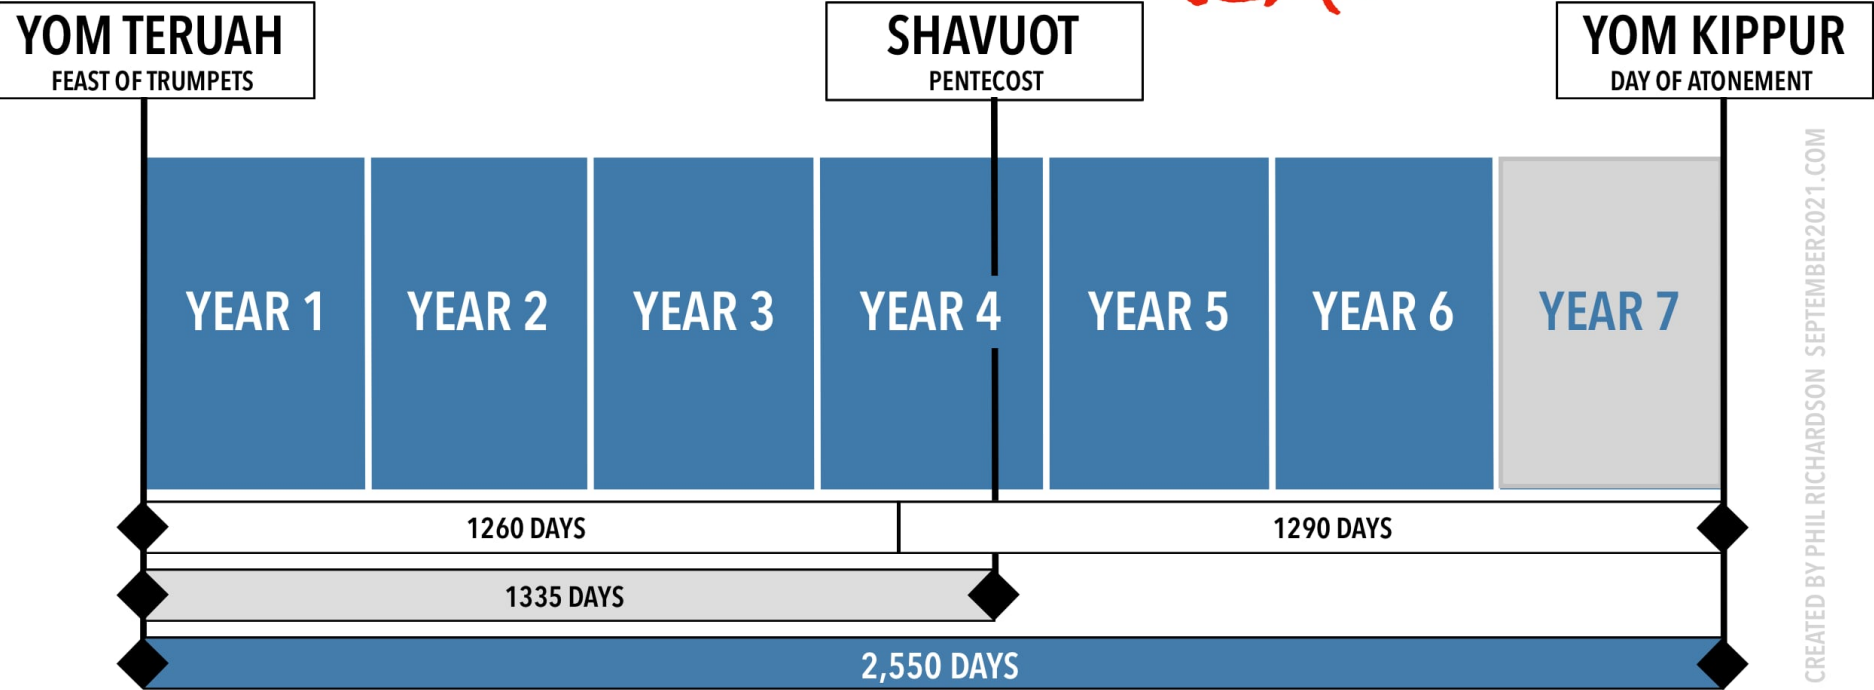

Phil Richardson created this graph and all of its contents.

Yom Teruah per TC		Yom Kippur		DAYS per TC	HC - YK Dates	days per HC	symmetry?	
9/24/2014	2014	9/17/21	2021	2550	9/15/21	2548	YES	within 2 days
